## CHAPTER 1

### DATA SUMMARIES

This chapter presents study data base data for each contractor and the Department of the Army Civilians (DACs). For this reason, the distribution of this volume is limited. These data were gathered through interviews, research, and questionnaires and were then reviewed, “scrubbed,” and entered into this data base.

This chapter is divided into three sections: U.S. contractors, foreign contractors, and DACs. The section on U.S. contractors contains a record for each of the 76 U.S. contractors that provided support during Operation Desert Shield/Storm. The section on foreign contractors contains 23 records, one more than the number of foreign contractors that provided support; that extra record was used as the “place holder” to aggregate those truck and bus drivers who served in each war phase but who could not be directly linked to a contractor. Therefore, when reviewing data about a foreign contractor, if the columns for personnel are blank, refer to the “Foreign Contractors” record. This record will show the number of truck and bus drivers who provided support for any particular war phase. Seven DAC records exist, one for each organization that the DACs reported to in the theater of operations.

Each record uses the same report format. Table 1-1 describes each acronym found in the header of the data base. The acronyms in the table are subcategories to the first entry above them. The “Contractor Name” and “Contract” data base fields are used only with contractor records, while the field for the acronym “DAC Report” only applies to DACs. All other acronyms apply to both contractors and DACs.

TABLE 1-1

## ACRONYM DESCRIPTION

Acronym	Description
CONTRACTOR NAME	Name of the contractor. This is a single entry per record.
CONTRACT	Contract number under which the support was provided. This is a single entry per record.
DAC REPORT	Command or organization the DAC reported to in theater.
MSC/OTHER	For contractors, the Government organization that contracted with the contractor. For DACs, the Government organization that provided the personnel. This is a single entry per record.
END ITEM SUPPORTED	Name of the end item that the contractor or DAC supported. This is a single entry per record.
PHASE	Phase(s) — Initial, Alpha, Bravo, and Charlie — in which support was provided. There may be multiple entries per record.
ORGANIZATIONAL LOCATION	Name of the organizational location where support was provided. For each war phase entry, this column may be filled or left blank.
SUB-ORG/FIXED LOCATION	Name of the specific activity at the fixed or organizational location where support was provided. For each war phase entry, this column may be filled or left blank.
FIXED LOCATION	Name of fixed location where support was provided. For each phase entry, this column may be filled or left blank.
CB	Did the contractor cross the border into Iraq or Kuwait during the ground war? If "yes," a "Y" is displayed; if no, this column is blank.
<u>PERMANENT (PERM) PEOPLE:</u>	
MNT	Number of personnel who were permanently stationed at the location providing maintenance support.
SUP	Number of personnel who were permanently stationed at the location providing supply support.
TRN	Number of personnel who were permanently stationed at the location providing transportation support.
<u>TEMPORARY (TEMP) PEOPLE:</u>	
MNT	Number of personnel who were temporarily stationed at the location providing maintenance support.
SUP	Number of personnel who were temporarily stationed at the location providing supply support.
TRN	Number of personnel who were temporarily stationed at the location providing transportation support.
NOV	Total number of visits made to the location by the temporary personnel during a war phase.
TDV	Total duration in days of the visits to the location made by the temporary personnel during a war phase.

## CHAPTER 2

### COST SUMMARIES

This chapter shows the costs associated with each U.S. contractor's efforts during Operation Desert Shield/Storm (ODS/S). Unless otherwise indicated, the data reflected here were provided by the contractors. When contractor data is not available, we substituted data provided by the major subordinate commands (MSCs). In each case, we attempted to correlate the contractor data with the MSC data. We often found figures that differed, which brings into question the reliability of the data provided. These discrepancies relate to two factors: reported periods of costs accumulation that do not match the ODS/S time frame and cost figures that include costs not directly incurred by the contractor in the theater of operations. Support days, which are defined as calendar days, are often estimates derived from our best approximation of when contractor personnel arrived and left the theater during any particular phase. Table 2-1 shows that information.

Because of the uncertainty of data presented in this chapter, we caution the reader not to attempt any type of computation, correlation, or extrapolation to derive information such as man-day costs, etc. We included the data to give the reader a "ballpark" feel for the costs involved. Those data are presented here as reported by the source. If required, we suggest that the appropriate MSC Directorate of Acquisition be queried for more definitive data.
